

Jordan Jansen

Junior Web Developer & IT Intern

Dubai, UAE | +971 54 379 2183 | jansenwp002@gmail.com | linkedin.com/in/jordan-jansen-52a5942b

PROFESSIONAL SUMMARY

Computer Science student at Heriot-Watt University Dubai with 5+ months of hands-on web development internship experience. Proven ability to deliver real-world projects across frontend development, ERP systems, automation, web scraping, and email marketing. Skilled in React, JavaScript, Python, ERPNext, and n8n automation. Passionate about solving practical business problems through technology.

INTERNSHIP EXPERIENCE

Junior Web Developer Intern — Web Development Team, Dubai, UAE

November 2024 – April 2026 (5.5 months)

Key responsibilities and accomplishments:

- Developed and launched a React-based frontend for a Floor Sale application (WEB-301)
- Built and maintained multiple company websites including GA Holding, GWM, and Aboudcar platforms
- Executed full rebranding of all websites from GA Group to GA Holding, updating branding across multiple live sites (WEB-299, WEB-312)
- Completed a GA Holding website revamp including UI/UX improvements and testing (WEB-340, WEB-410)
- Developed vehicle comparison tables and pages for Aboudcar (WEB-431, WEB-439)
- Implemented a floating navigation menu for the GWM website (WEB-428)
- Designed and updated GWM vehicle prices page (WEB-440)
- Completed the Indo Food page for adfoodhub.com (WEB-339)
- Configured and managed Hubspot Dashboard for marketing analytics (WEB-405)
- Produced 15+ branded email newsletters for Grandiose and GrandRose brands across multiple campaigns
- Created user and admin step-by-step documentation for the GWM website (WEB-283, WEB-284)
- Reviewed and audited websites including King Long Automotive and GWM against IT engineering standards (WEB-278, WEB-279, WEB-280)
- Deployed and configured ERPNext on localhost using Docker Desktop (WEB-313)
- Developed ERPNext customisations using Client Scripts in JavaScript (WEB-298)
- Configured email systems within ERPNext (WEB-325)
- Built an MCP server using Python for AI system integration (WEB-450)
- Automated workflows using n8n, including sample task creation and WhatsApp inquiry automation (WEB-282, WEB-382)
- Performed web scraping tasks including product data extraction and Carrefour price scraping using EAN numbers (WEB-275, WEB-324)
- Explored and documented WordPress and ERPNext platforms for team knowledge base (WEB-269, WEB-290)
